DELHI TECHNICAL CAMPUS WEBINAR ON CAREER COUNSELLING

15th June'21

The cancellation of the class XII Board exams has left the young minds and their parents gripped in uncertainty as they are faced with the ambiguity of undergraduate admissions. The admission conundrum is beyond the comprehension of the brigade of students who need support and appropriate guidance to traverse in the right direction.

What better way can one think of than hearing about the various career prospects and making informed and well thought out plans. The students need to be apprised that a decision is still awaited from CBSE which will set the guidelines to the renowned universities like DU and IP whether to go by the cut offs or select students via an entrance test. Nevertheless, a candid discussion may help in widening the arena of knowledge related to the opportunities in the different streams.

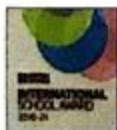

Knowing that the pandemic has affected many homes, students in the NCR region may think about the options that are well within their reach. Some students are aware of the high cut offs and traditional and theoretical courses of Delhi University and would not like to face the tough challenges.

There are other well established academic institutions which have carved a niche by catering to the students' immediate needs. The IP university popularly known as Guru Gobind Singh Indraprastha University (GGSIPU/IP) is a preferred choice for many of the students as it has multiple departments or schools in different disciplines. It is a much sought-after state university, located in Delhi. Some of the notable courses run by the institute are University School of Information, Communication and Technology, Chemical Technology, Environment Management to name a few. The University has ties with various corporate companies where students are able to gain confidence through mock interviews, aptitude test, internship opportunities and group discussions.

The university makes a conscious effort not to compromise on the quality of education. Hence, students are admitted through competitive exams like JEE, CET and the like. One can find the smart crowd of public-school students as it ensures 85% reservation to Delhi candidates. Another significant feature is the specific fee fixed by GGSIPU which generally starts from 1- 1.5 lacs per year depending on the choice of the course.

One of the exclusive colleges of the IP university is the Delhi Technical Campus, Greater Noida which offers traditional and professional courses like BTECH, BARCH, BCA, BHMCT, BA, BCOM and MBA. A unique facility allows students to stay 5 days in the hostel and enjoy the weekend at home. The college also provides transport facility for Delhi NCR students connected to major metro stations. The institute offers scholarships to meritorious students and has newly introduced the COVID scholarship for students who have suffered the loss of parent/s during COVID.

Greater Noida being the hub of companies, students get an added advantage of getting placements easily. The college takes great pride in sharing that their students got placed in top 30 Indian companies – IBM, Deloitte, TCS, HCL, Wipro, Cognizant, Byjus, Extra marks, Lido Learning etc. For more information, the panel of academicians present here will surely guide you further.

Campus: HS 57, Knowledge Park 5, Greater Noida West (Noida Extension)
